

# *Times they are a Changing!*

## *Climate Change from Women's Perspective*

Do you have a concern about climate change or would you simply like more information about this issue?

### **If so, you may be interested in attending the *Women and Climate Change Action Workshop***

This workshop will give participants an opportunity to hear some of the most recent thinking regarding the impact of climate change in rural Australia, with a focus on strategies and skills to recognize and give full effect to women's capacity for local leadership.

The workshop will be run by Mary Crooks and Liz McAloon of Watermark Australia, a water education initiative of the Women's Trust. Copies of *Our Water Mark; Australians making a difference in water reform* will be available to all participants.
